PROTECTIVE COVER

At POINT we recommend simple measures to protect outdoor furniture and make it more durable.

For this purpose, we created the Protective Cover, a special protective sheet, available in beige and made from polyester with acrylic lacquer.

It is waterproof and treated with a fungicide on the inside. It also repels dirt and is heat, cold and weather resistant.

Each piece comes with its own cover. It also includes a tie so you can adjust the cover to the furniture around the base to secure it against the wind.

For the best results, the furniture and cushions should be dry before they are covered in order to avoid moisture and mould stains.
